## **REFERENCE LETTER**

**To Whom it may concern**

OPENINTEGRA has been our technology partner for the mobile banking platform of DSK Bank since May 2012. Their team's deep knowledge and expertise in Internet, security and mobile technologies was an invaluable asset for the final success of this challenging project. We strongly rely on OPENINTEGRA for the future implementation of our mobile banking strategy.

Thanks to their universal understanding of IT they have managed not only to develop the mobile applications for DSK Smart (for iOS, Android and Windows, both in phone and tablet versions) but also to design and to build the server-side integration layer of the platform which communicates with our core banking system.

The mobile banking platform has helped DSK Bank, as the second-largest bank in Bulgaria, to attract new and young customers. Currently we are working close with the company's production people and the executive team on a new multiplatform (iOS, Android, Windows) mobile app for the corporate customers of DSK Bank - DSK Business.

I am happy to recommend OPENINTEGRA as a reliable software vendor with deep knowledge and expertise in web, Internet, mobile technologies, and excellent delivery capabilities in terms of time, budget and quality.

**Yours Sincerely,**

**Yuriy Genov,  
Executive Director**
