OPENINTEGRA is our infrastructure and data center services partner recommended by IBM as their business partner focused on infrastructure services. In all aspects of our relation the highly professional and diligent team of Openintegra was a reliable and predictable partner that completely fulfills all our expectations.

They support our process of building and implementing new data center environment for SAP based on IBM servers, SAN, storage and VMware. Openintegra's team deep knowledge in server and virtualization infrastructure, storage and networking technologies was an invaluable asset during our project.

I am happy to recommend Openintegra as a reliable service provider and system integrator with deep expertise and excellent delivery capabilities in terms of time, budget and quality.
